Welcome to your Cool Keyboard!

Man & Machine's "cool" line of keyboards offer lots of value and options. These keyboards are waterproof and contaminant proof and are ideal for industrial, marine, and medical use, as well as other applications where moisture, cleaning, and durability are a consideration.   And they are much quieter than "standard" keyboards. Some of our keyboards can be equipped with our Backlight option where LED's are installed under each key for use in dark or low light conditions, and our "MAGFIX" option where magnets are installed in the base to help hold it in place on ferrous surfaces. Our "cool" keyboards are also available with built in touchpad's for an "all in one" solution.

Product Specifications and Options Vary, please see our website for more information at www.man-machine.com.
