# Medical Grade™ Really Cool Touch Keyboard

Choice is everything! The best pointing devices are seamlessly integrated with other keyboard features. Touchpad, size, ergonomics – even style – all must be in harmony for a user to be comfortable and productive.

Whatever its features, no keyboard should compromise the health of you, your staff, or your patients. Ordinary keyboards are vulnerable to blood, splatter, and contaminants that no disinfectant can reach. You can't be confident that a keyboard will enhance your infection control protocols unless that keyboard is Medical Grade™.

**Tru-Lock** - Lock it, then clean it. TruLock prevents unwanted characters and commands from being entered during cleaning & disinfection procedures

**Sealed Low Profile Design** - Easily clean and disinfect between the keys with an EPA-registered wipe. Sealed design prevents blood splatter and other bio-load from getting trapped between and beneath the keys.

**Multi-Level Backlight** - Our backlight lets you type in low light environments. Set the backlight to your exact preference.

**MagFix** - Built-in magnets allow typing at any angle when using on wall-mounts or keyboard flip-up trays. Avoid the use of dirty Velcro™ and double-sided tape.

**Smart Cable**: Non-standard cable lengths available

**Private Label** - Add a one-color custom logo
