Slim Cool Plus Keyboard

#1 Laptop-style Keyboard for Infection Control

The Slim Cool Plus checks all of the boxes. Its sealed, seamless, ergonomic, silent, and includes an integrated touchpad.

No keyboard should compromise the health of you, your staff, or your customers. Ordinary keyboards are vulnerable to blood, splatter, and contaminants that no disinfectant can reach.

The Slim Cool Plus can hold up to the rigors of typing by multiple users 24/7, and repeated harsh cleaning and disinfecting using a bleach solution or standard hard surface disinfectants. Featuring TruLock, our key lock technology, for easy cleaning at the workstation without detaching the keyboard from the PC.

The low profile design of the Slim Cool Plus allows for a one-wipe clean, and has the familiar tactile feel of a standard laptop keyboard without annoying clicks. Its compact size with full-sized keys and integrated touchpad, makes this keyboard the perfect fit on any workstation where space is limited.

Optional multilevel backlight for typing in low-light environments, and MagFix (built-in magnets) eliminate the need for dirty Velcro™ or tape, make the Slim Cool Plus the ideal solution throughout any facility.

Tru-Lock - Lock it, then clean it. TruLock prevents unwanted characters and commands from being entered during cleaning & disinfection procedures
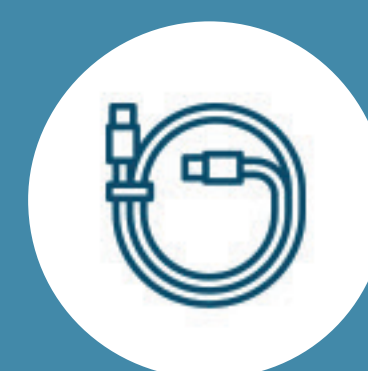

Sealed Low Profile Design - Easily clean and disinfect between the keys with an EPA-registered wipe. Sealed design prevents blood splatter and other bio-load from getting trapped between and beneath the keys.

Multi-Level Backlight - Our backlight lets you type in low light environments. Set the backlight to your exact preference.

MagFix - Built-in magnets allow typing at any angle when using on wall-mounts or keyboard flip-up trays. Avoid the use of dirty Velcro™ and double-sided tape.

Smart Cable: Non-standard cable lengths available

Private Label - Add a one-color custom logo
