

PRIVATE EYE™ MONITORS

Tamper-Proof Privacy Solution

The Man & Machine Private Eye™ is a high-quality LCD monitor with a premium privacy filter that can be installed behind the monitor bezel, or laminated to the front panel, to obscure critically important data from any angle except direct line-of-sight. Man & Machine has over 30 years' experience in enhancing and modifying computer monitors. As an OEM Partner with Dell, HP, Planar and Samsung, we can offer this tamper-proof solution without voiding the monitor warranty.

FEATURES

- Vertical Viewing Angle: 30° L,R
- Integrated privacy filter provides a tamper resistant solution;
 - Provides visual security on monitors
 - Blocks unauthorized viewers from seeing information from side views. Users see clearly when directly in front of the display
 - Anti-reflective coating reduces glare for more effective viewing
- Additional layer of monitor screen protection
- Supports compliance with Federal Privacy Legislation impacting: Healthcare, Education/Libraries, Financial/Banking & Government.
